

Advantages of Cyntech's Pipeline Anchoring System

- Larger spacing along the pipeline
- 50% cost savings compared to traditional solutions
- Less transportation and traffic
- Buoyancy control, stabilization and overbend resistance
- Increased safety
- 90% reduction in GHG emissions

**FIRST IN FOUNDATIONS
ANCHORED IN EXPERIENCE™**

Do More with Less

Using anchors means less material to store, transport, and install, resulting in significant cost savings and reduction in GHG emissions.

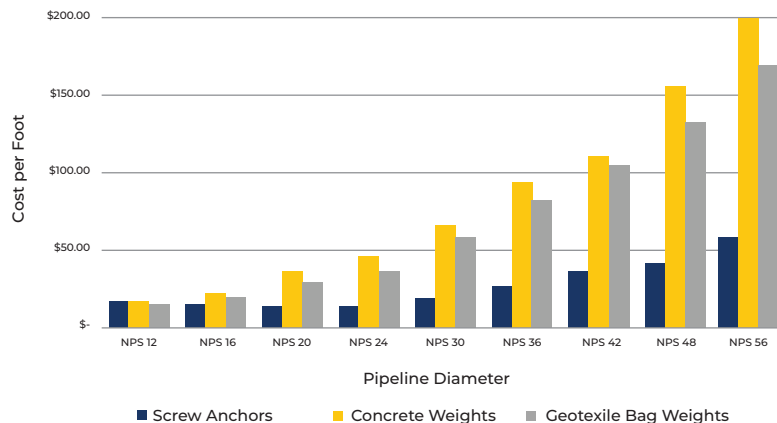

Reduce Costs

- Installation requires less manpower, equipment, and time.
- Anchors can be spaced up to 110 meters apart.

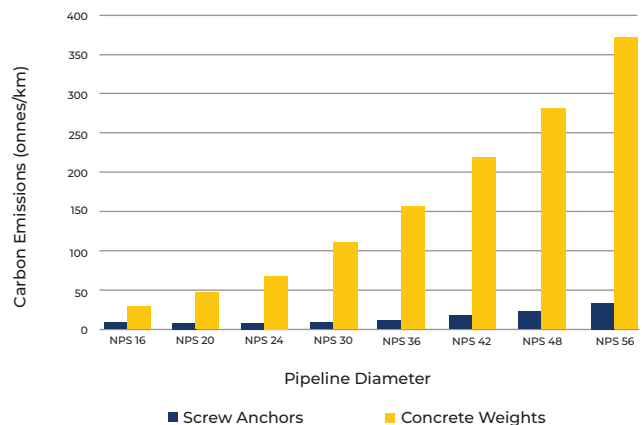

Reduce Emissions

- Concrete production contributes at least 8% of global emissions - Anchors eliminate concrete.
